

Deom Gateway System

The Next Phase of Technology Implementation for A Nation Prepared to Lessen Their Dependency on Oil.

Changes on the horizon

With the announcement of the COEIA-KSU and Slnee agreement in Open-Source, the future looks vibrant and more efficient. The mandate to shift towards an Open-Source model opened a gap and dependency for quality assurance, security, accreditation, and certification. Our agreement provides confidence that all Open-Source products are approved and certified before being placed on the DEOM platform.

This Partnership opens massive revenue earning opportunities for COEIA-KSA, Municipalities, and other governmental agencies through future integration with the platform and the Deom Gateway System.

It's not a secret that the world is changing at an exponential rate. The workforce of today is drastically different from that of the past. For instance, we're still in the very early stages of what appears to be a complete tech revolution. Deom serves as a national hub for industry-based training programs that prepare students and professionals to transition their careers for jobs in Open-Source positions.

The Gateway System's introduction will connect organizations to the General Authority of Zakat and VAT through the Deom platform. Slnee will be the first organization to integrate the government ERP reporting mechanisms into a private sector platform to ease company reporting and categorize SME's paperwork needed for reporting and auditing. The Deom Gateway System functionality resembles that of Abshir. Still, it serves as the primary purpose of connecting municipalities to legally registered businesses reporting their Zakat and VAT.

THE BIGGER PICTURE

Deom continues to innovate. We take pride in providing Kingdom-wide Entrepreneurs, SME's, Municipalities, and Government agencies with low-cost, efficient, and low maintenance solutions in SaaS. We are ready to give onboarding to help you integrate the Gateway System into your organization.

THE GATEWAY SYSTEM (PUBLIC & PRIVATE)

The company must have an account with the General Authority of Municipalities.

ERP & VAT reporting software purchased through Deom.

Customers have an option to bundle their purchases with ongoing accounting support to help manage their reporting and keep track of their data.

After purchasing through DEOM, the customer will be given an account in the Gateway System.

They will have the option to fill out the form independently or request a Deom/General Authority support specialist for assistance.

The gateway system will allow the customer to complete a form for their VAT and Zakat reporting.

After completion, the customer submits the form into the system. The file is sent to the receiving Municipality through a secure one-way API token, with the customers' file and account.

THE GATEWAY SYSTEM (GOVERNMENT)

Government agencies access a privately built and secure version of Deom.

Deom creates a secure or customized-secure API token for each agency to interact with the public and private customers they represent and serve.

Each sector will have an API token to access Deom, which connects them to the customer for secure file sharing and communication.

FINANCIAL FORECAST

With the agreement with COEIA-KSU, Deom is on target to eclipse 100SAR Million in only three years. However, with the addition of the Gateway System, profits can pass SAR60million in the first year. Still, we will likely discover an even higher return on this initiative.

With this forecast, Slnee can:

Go public with IPO (Initial Public Offer), Crypto with an ICO (Initial Coin Offer), or directly deal with high-level venture capital investors in the local community.

Sign agreements with the public and government sector that create custom API's to allow their system to communicate to their clients through the Deom platform.

Create jobs and scaleable encrypted digital databases.

COST PER COMPANY

The Deom Gateway System by design is:

Cost-effective & affordable

Free to the business owner when reporting a loss of profits, or no profit was made.

Resourceful for businesses, offering a subscription service that assists with monthly accounting, quarterly reports, or only one-time per year reporting.

A monthly (12-month plan) is preferred and most cost-effective with value-added savings to establish a virtual office with your Deom account.

Quarterly (4-month reports) will have a reduced fee but is not the highest level of savings. Customers also will not have the option for a virtual office with the Deom account.

12 MONTHS

4 MONTHS

ONE TIME

On-Time Zakat reporting is your emergency solution. No Virtual Office account with this package.
